
Sustainability Report

Global Sustainability Fixed Income Portfolio

Data as of December 31, 2023

This information is not meant to constitute investment advice, a recommendation of any securities product or investment strategy (including account type), or an offer of any services or products for sale, nor is it intended to provide a sufficient basis on which to make an investment decision. Investors should consult with a financial professional regarding their individual circumstances before making investment decisions.

There is no guarantee investment strategies will be successful. Investment risks include loss of principal and fluctuating value. Environmental and social screens may limit investment opportunities for the fund.

Dimensional Fund Advisors LP is an investment advisor registered with the Securities and Exchange Commission.

Consider the investment objectives, risks, and charges and expenses of the Dimensional funds carefully before investing. For this and other information about the Dimensional funds, please read the prospectus carefully before investing. Prospectuses are available by calling Dimensional Fund Advisors collect at (512) 306-7400 or at dimensional.com. Dimensional funds are distributed by DFA Securities LLC.

Focused Approach Guided by Science

Data Driven

We use environmental data to identify issues we believe have the potential to impose significant external costs on future generations.

Climate Focused

Our approach to sustainability focuses on the emissions that cause climate change.

Transparent Reporting

Our strategies are designed to provide a meaningful reduction in carbon footprint exposure.

Dimensional's sustainability strategies pursue reduced carbon footprint exposure.

Emissions Data

Focusing on greenhouse gas emissions data enables a climate-focused investment approach

Relevancy

Greenhouse gas emissions are the primary driver of climate change.

Accessibility

Companies around the world report greenhouse gas emissions annually.

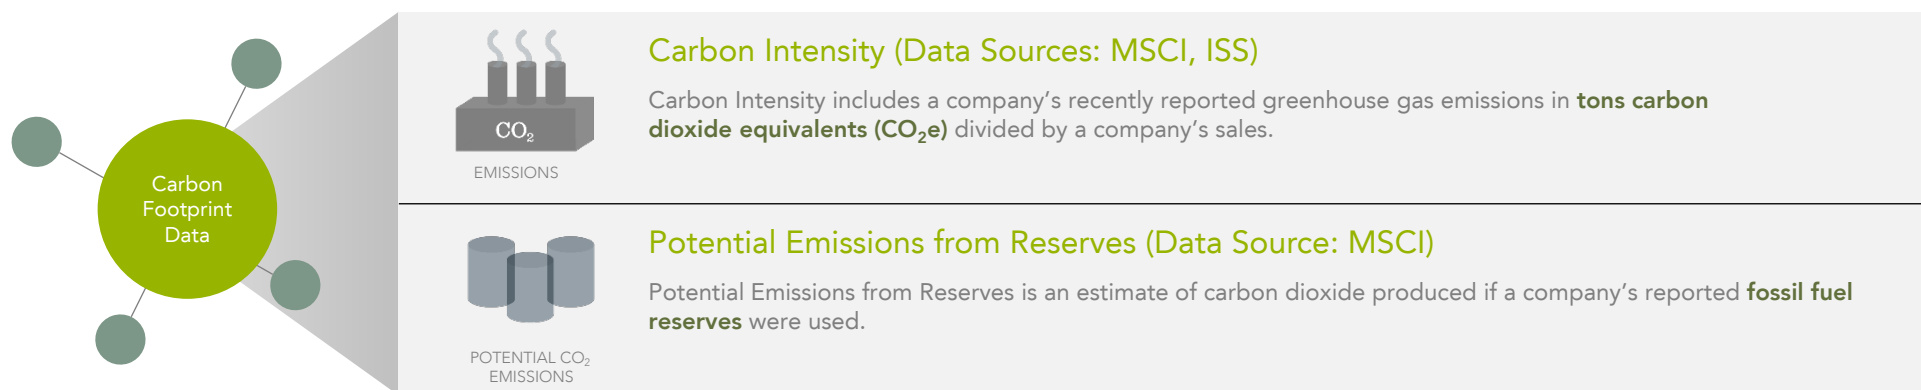

Comparability

Comparing companies' emissions data allows investors to compare companies' environmental characteristics.

Understanding Carbon Footprint Data

Evaluating company emissions by considering what's in the air and in the ground

Carbon Footprint Components:

Carbon Concepts at a Glance

What are carbon dioxide equivalents (CO₂e)?

CO₂e is a unit used to compare emissions of the seven greenhouse gases by converting each gas to an equivalent amount of CO₂ based on their global warming potential.¹

What is 1 Ton CO₂e?

Equivalent to emissions from **113** gallons of gasoline consumed¹

Equivalent to carbon sequestered by **1.2** acres of US forests in one year¹

What are fossil fuel reserves?

Companies may have physical assets that include coal, oil, and natural gas, which can lead to high emissions in the future.²

1. Source: EPA.gov.

2. Source: MSCI.

Carbon Intensity represents a company's recently reported or estimated Scope 1 (direct) + Scope 2 (indirect) greenhouse gas emissions in carbon dioxide equivalents (CO₂e) normalized by sales in USD (metric tons CO₂e per USD million sales). Greenhouse gases included are carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), sulfur hexafluoride (SF₆), and nitrogen trifluoride (NF₃). **Potential Emissions from Reserves** is a theoretical estimate calculated by MSCI of carbon dioxide produced if a company's reported reserves of oil, gas, and coal were converted to energy, given estimated carbon and energy densities of the respective reserves.

Carbon Footprint

Emissions exposure as of December 31, 2023

Weighted Average Carbon Intensity

Corporate Bonds Only

Weighted Average Potential Emissions from Reserves

Corporate Bonds Only

Weighted Average Carbon Intensity is found by calculating the recently reported or estimated Scope 1 (direct) + Scope 2 (indirect) greenhouse gas emissions in carbon dioxide equivalents (CO₂e) normalized by sales in USD (metric tons CO₂e per USD million sales) for each portfolio or index company and calculating the weighted average by portfolio or index weight. Greenhouse gases included are carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), sulfur hexafluoride (SF₆), and nitrogen trifluoride (NF₃). **Weighted Average Potential Emissions from Reserves** is found using a theoretical estimate calculated by MSCI of carbon dioxide produced if a company's reported reserves of oil, gas, and coal were converted to energy, given estimated carbon and energy densities of the respective reserves, for each portfolio or index company and calculating the weighted average by portfolio or index weight. Please see "Sustainability Data Description and Disclosures" for additional information. Bloomberg data provided by Bloomberg. "Bloomberg Global Aggregate Bond Index" shown in charts is the Bloomberg Global Aggregate Bond Index (Hedged to USD).

Security Type and Corporate Sector Weights

Characteristics as of December 31, 2023

DISTRIBUTION BY SECURITY TYPE (%)

SECTOR WEIGHTS FOR CORPORATE BONDS (%)

Sector Weight Distribution by Carbon Intensity

As of December 31, 2023

Corporate sectors defined by Barclays class 2 sector classifications for corporate issuers. Please see "Sustainability Data Description and Disclosures" slide for additional information. Within the portfolio's target market, region, and industry, each company is classified from Lower Carbon Intensity to Higher Carbon Intensity. The Lowest Carbon Intensity group is defined as approximately the third of companies with the lowest carbon intensity. The Average Carbon Intensity group is defined as the next third; and the Higher Carbon Intensity group is defined as approximately the third of companies with the highest carbon intensity. Within the target market. Bloomberg data provided by Bloomberg. "Bloomberg Global Aggregate Bond Index" shown in charts is the Bloomberg Global Aggregate Bond Index (Hedged to USD).

Sustainability Data Description and Disclosures

Data Provider Disclosure

Certain information incorporated herein has been provided by Institutional Shareholder Services Inc. ("ISS") and by MSCI ESG Research Inc. ("ESG"). Although Dimensional Fund Advisors' information providers, including without limitation, ESG and its affiliates (the "ESG Parties"), obtain information from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy, and/or completeness of any data herein. None of the ESG Parties makes any express or implied warranties of any kind, and the ESG Parties hereby expressly disclaim all warranties of merchantability and fitness for a particular purpose, with respect to any data herein. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein. Further, without limiting any of the foregoing, in no event shall any of the ESG Parties have any liability for any direct, indirect, special, punitive, consequential, or any other damages (including lost profits) even if notified of the possibility of such damages.

Additional Information

Carbon Intensity and Potential Emissions from Reserves data is provided by third-party data providers, and methodology is subject to change with data developments or other findings or events. Third-party emissions data is available for over 99% of public companies. For companies where data is not available, Dimensional applies a sector average value.

Disclosures

Consider the investment objectives, risks, and charges and expenses of the Dimensional funds carefully before investing. For this and other information about the Dimensional funds, please read the prospectus carefully before investing. Prospectuses are available by calling Dimensional Fund Advisors collect at (512) 306-7400 or at dimensional.com/prospectus. Dimensional funds are distributed by DFA Securities LLC.

Dimensional Fund Advisors LP is an investment advisor registered with the Securities and Exchange Commission.

Risks include loss of principal and fluctuating value. Investment value will fluctuate, and shares, when redeemed, may be worth more or less than original cost.

Small and micro cap securities are subject to greater volatility than those in other asset categories.

International and emerging markets investing involves special risks such as currency fluctuation and political instability. Investing in emerging markets may accentuate these risks.

Sector-specific investments focus on a specific segment of the market, which can increase investment risks.

Fixed income securities are subject to increased loss of principal during periods of rising interest rates. Fixed income investments are subject to various other risks, including changes in credit quality, liquidity, prepayments, call risk, and other factors. Municipal securities are subject to the risks of adverse economic and regulatory changes in their issuing states.

Real estate investment risks include changes in real estate values and property taxes, interest rates, cash flow of underlying real estate assets, supply and demand, and the management skill and creditworthiness of the issuer.

Sustainability funds use environmental and social screens that may limit investment opportunities for the fund.

Commodities include increased risks, such as political, economic, and currency instability, and may not be appropriate for all investors. The Portfolio may be more volatile than a diversified fund because the Portfolio invests in a smaller number of issuers and commodity sectors.

The fund prospectuses contain more information about investment risks.
